

REO Rotary Potentiometers offer fine adjustment of voltage and current in a number of applications, especially where the use of sophisticated control electronics is not desirable for example in arduous environments.

- Power range 16W to 750W
- Resistive Tolerance +/-10% (+/-5%)
- Higher powers achievable using dual and triple gang units
- Graded or stepped windings optional
- Available with integral microswitches
- Motor drives available - contact us for options
