

CNW 903

Three-phase line reactor 4% Uk

Unique Selling Point

- Compact design
- Extended life-time of electrical consumers
- Low temperature rise
- Attenuation of current spikes up to 60%
- Reduction of input current up to 20%
- Low noise
- Production according to UL insulation system E251513 possible

Description

Power Noise Reduction - save up to 20% energy costs. A mains choker relieved the supply network by compensating the harmonics reactive power. The harmonics and commutation notches are reduced strongly. By using a mains choke the inverter electronics and DC-capacitors will be protected.

Starting currents and current peaks are reduced up to 60%. Mains chokes help to comply with international power quality standards IEEE 519 or EN 61000-3-2.

- Rated voltage: $U \leq 3 \times 500 \text{ V}$
- Short circuit: Uk 4% (400VAC/50Hz, INenn)
- Frequency: 50/60 Hz
- According to: EN 60289 / EN 61558
- Test voltage: L-L 2,500 V, DC 1min; L-PE 2,500 V, DC 1min
- Insulation class: T40/F
- Protection rating: IP00
- Climatic category: DIN IEC 60068-1
- Overload: 1.5 x INenn 1 min / h
- Design: mounted on footprint

Typical applications

- Drive systems for motor drives:
 - Mechanical engineering
 - Elevators / escalators
 - Pipes
 - Conveyor technology
 - Ventilation and air conditioning
 - Robotics
 - Automation technology
- Power supplies
- Wind turbines

Technical Data

- Nominal Voltage : 3 x 500 V
- Rated current : 3-1200 A
- Inductance : 9.800-0.024 mH
